TECH SKILLS

- Linux
- Git, GitHub
- Bash Scripting
- AWS
- Terraform
- Ansible
- Docker
- VMware
- Kubernetes
- Prometheus, Grafana

LANGUAGES

- English
- Hindi

PROFILE

DevOps enthusiast with hands-on experience in AWS, Terraform, Ansible, and Bash scripting. Skilled in automating infrastructure, managing configurations, and streamlining deployment workflows through practical projects. Interested in building reliable and scalable cloud solutions.

PROJECTS

AWS EC2 Portfolio Deployment with Terraform (Route 53)

- Deployed a portfolio website on AWS EC2 using Terraform (Infrastructure as Code)
- Configured Route 53 for custom domain routing
- Automated provisioning of compute resources and networking components
- Ensured reliable hosting with scalable cloud infrastructure

Dockerized Multi-Tier Application (nginx, backend, mysql)

- Dockerized a multi-tier application with Nginx (reverse proxy), backend service, and MySQL database
- Created and managed containers using Docker and Docker Compose
- Configured inter-container networking and environment variables for seamless communication
- Improved application portability and simplified deployment across environments

Auto Scaling & Load Balancing on AWS (JMeter, Target Groups)

- Set up EC2 instances behind an Application Load Balancer with target groups
- Configured Auto Scaling to adjust instances based on traffic load
- Used JMeter to simulate traffic and test system behavior under load
- Observed request distribution and scaling response to ensure availability

EDUCATION

Computer Science Engineer 2021 - 2025
KCT College Of Engineering | VTU University - 7.9 CGPA

CERTIFICATIONS

Internship certification in Devops from [Rooman](#), [ibm](#).
